DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/27/2005 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bookbrowse.com in view of Garrido and Kitamura (6,829,594).

Bookbrowse shows displaying a list of books in a recommendation home page; a customer selecting a book from the list and in response the the customer's selection, displaying a portion of the book on the display; when the customer wants to purchase the book, inputting by the customer predetermined items to buy the book (since it shows linking to and buying from Amazon.com to purchase and Amazon requires

Application/Control Number: 09/909,078

Art Unit: 3627

predetermined items including at least name and mailing address and the number of copies), sending via telecommunication line the predetermined items to a vendor (Amazon) who delivers the book. It does not show that the online vendor prints the book, or that the entire contents of the book are available for display.

Garrido shows an online vendor printing the book on demand. It would have been obvious to one of ordinary skill in the art to modify the method of Bookbrowse by printing the book on demand in order to reduce waste associated with large scale printing.

Kitamura shows providing the entire contents of the book for browsing (Kitamura provides for browsing of all content with a time limit per page, among other embodiments as in Fig. 3). It would have been obvious to one of ordinary skill in the art to further modify the method of Bookbrowse by providing the entire content as taught by Kitamura in order to better enable the customer to select books for purchase.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Regarding the combination of Bookbrowse and Garrido, the examiner respectfully disagrees.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections

Application/Control Number: 09/909,078

Art Unit: 3627

are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

With respect to Applicant's argument that Barrido does not show a "printer of book-binder having text on-hand which is then printed", it is noted that this is not claimed.

Regarding Applicant's argument that motivation is lacking for the combination, it is noted that Barrido shows this motivation for online vending of books which are printed on demand (see e.g., the Abstract).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven B. McAllister whose telephone number is 571-272-6785. The examiner can normally be reached on M-Th 8-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexander Kalinowski can be reached on 571-272-6771. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
